

## “EXPANDED PERSPECTIVES, ALTERNATE FIELDS”

LAMBERT MORALOKI + BRIGITTE HERTELL

‘Expanded painting’ is a fairly recent term which refers to the interaction between painting and other media or process, and is a field that is increasingly intriguing many contemporary artists internationally.

The artworks in this show are assembled and reassembled fragments of mystical narrative and innovative reflections on environment. They are construed as maps of consciousness. Charting human responses to a surrounding that increasingly requires separation of instinct from intellect. The two artists skillfully probe the boundaries between figuration and abstraction, and create and auspicious new analogy from a variety of perspectives.

Launches: 6th October 2008 - 6:30PM
